

Telephone Ring Alert (Visual & Audible)

The Visual Ring Alarm is used in situations where the standard telephone ring is not loud enough to be heard. Situations such as factories, outdoor areas etc can benefit from these units.

The following models are available:

Line Powered (High Intensity 5mm LED)
Strobe Unit (Red & Blue)
High Powered Strobe (Red, Amber & Blue)
Combined Light & Audio unit
Rotating Lamps (Medium, High Power)

Busy Line Indicators

The Busy Line Indicator is used in situations where 2 or more phones are connected in parallel. The Lamp gives an indication when one of the handsets are in use. This stops annoying interruptions from other users. The following models are available.

High Intensity 5mm LED unit (Line Powered)
Strobe Unit (Red & Blue)
High Power Strobe (Red, Amber & Blue)
Rotating Light Units (Medium & High Power)

Combined Ring & Off Hook Indicator

Used in the same situations as described above. The unit will flash when the phone is ringing and glow steady when Busy or Off Hook. The following models are available.

High Intensity 5mm LED Unit (Line Powered)
31mm Incandescent Lamp (Blue, Amber or Red)
240 Volt Incandescent Lights (40W,60W,100W)

Message Waiting Lamp (Item No. 2500)

The Message Wait Lamp is used on telephone systems that have message wait but the handsets do not. The neon lamp triggers at the message wait voltage of about 80 volts. The lamp sits across the line. The unit can be attached to the back of the handset by double sided tape. The lamp comes with an RJ12 socket to receive the incoming line cord and a flying lead to plug into the handset.
